

NEW RED ALERT DrainProtector® II SAFETY SEAL

FROM THE MAKERS OF THE ORIGINAL DRAINPROTECTOR

The **DrainProtector II** is a **NEW Reversible Product**. The pad is constructed of a **Solid Tacky Urethane Product** with **No Fillers** that delivers a **Tough, Durable Seal** using either side. Due to its lighter weight, it can be used quickly for emergency chemical spills.

LIGHT WEIGHT AND EASY-TO-USE: The DrainProtector II is made of a solid tough polyurethane. It requires no reinforced fillers making it light weight and easy to handle.

REVERSIBLE: Since the DrainProtector II is tacky on both sides, either side can be used to form a tight seal to block out liquids.

REUSABLE: After using, simply wash, replace the plastic film, roll it on the tube and return the tube to the container. The DrainProtector II is tough enough to stand up to repeated use.

CHEMICALLY RESISTANT: The polyurethane is compatible for use with a wider range of chemicals and substances than rubbers and plastics. It is often more suitable when coming into contact with certain solvents, oils and chemicals. Plus, it's environmentally safe.

LARGE STOCK:

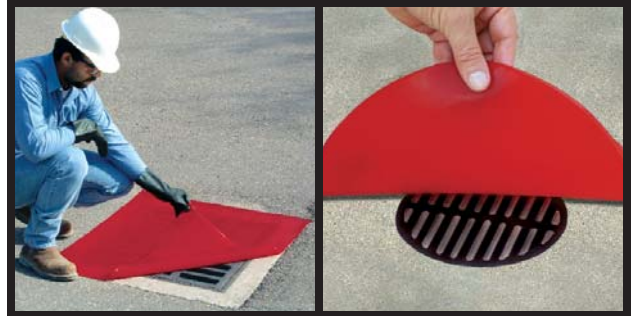

Squares	Rounds	Rectangles
18" x 18"	12"	18" x 60"
24" x 24"	20"	36" x 60"
