

# HOW TO USE

**A PROTECTIVE COVER FOR DRAINS, GRATES AND MANHOLES AGAINST ACCIDENTAL SPILLS.**

## 3 EASY STEPS

to assure maximum effectiveness:

### 1 Make sure the DrainProtector™ Safety Seal is the correct size.

- For best results, use a DrainProtector Safety Seal that is 6" larger than the outside of the drain.

### 2 Apply the DrainProtector Safety Seal.

- Be sure all stones, branches, or other debris are removed from the drain you are covering.
- Remove the plastic film from the DrainProtector and save it to replace after use.
- Place the DrainProtector Safety Seal YELLOW SIDE UP over the drain, grate, or manhole you are sealing.
- For a faster seal, you may step on the DrainProtector Safety Seal. Never attempt this if the spill has already reached the drain.

### 3 Always wash the DrainProtector Safety Seal before reuse or storage.

- Wash the DrainProtector Safety Seal in warm water with a non-abrasive detergent or petroleum solvent cleaner. Dry with a cloth and re-apply the plastic film.
- Using the tube provided, roll the DrainProtector Safety Seal ORANGE SIDE IN and place it back into the box provided for storage. **IMPORTANT:** Do not store without protective plastic film.
- Store the DrainProtector Safety Seal out of direct sunlight. Do not store in high humidity or where temperatures exceed 120°F.
- Due to the nature of softer urethane, the physical properties of these products may change over time with exposure to certain environmental conditions like temperature, humidity and UV radiation. Typical product life expectancy is 5 years. Please inspect the stored product regularly to ensure it is in a usable state.

# ORIGINAL DRAIN PROTECTOR™ SAFETY SEAL

**MADE IN THE USA**

Manufactured by PSI Urethanes, Inc., Austin, Texas

## PROTECTS DRAINS FROM HAZARDOUS CHEMICAL SPILLS
